

# GES-300 H<sub>2</sub>/O<sub>2</sub> Fuel Cell Trainer

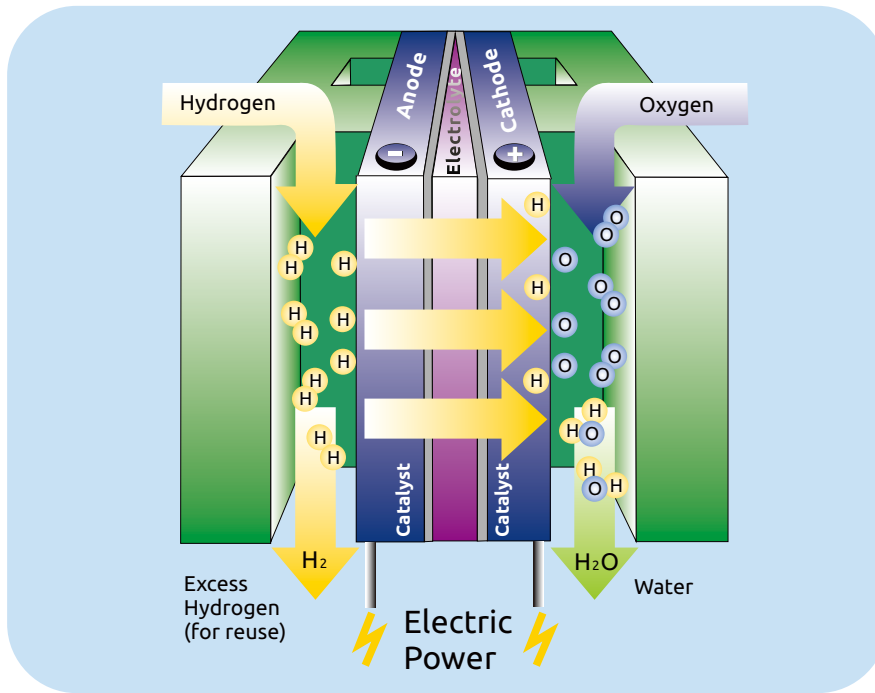

GES-300 is a basic trainer of the Proton Exchange Membrane Fuel Cell (PEMFC). It makes students understand how to produce the fuel via electrolysis and use the produced fuel to generate electricity.

H<sub>2</sub>/O<sub>2</sub> Fuel cell technology offers clean, efficient, reliable power source to almost any device requiring electrical power. It is a device that has been designed to convert chemical energy into electricity, and the only by-products generated from the fuel cell are pure water and heat.

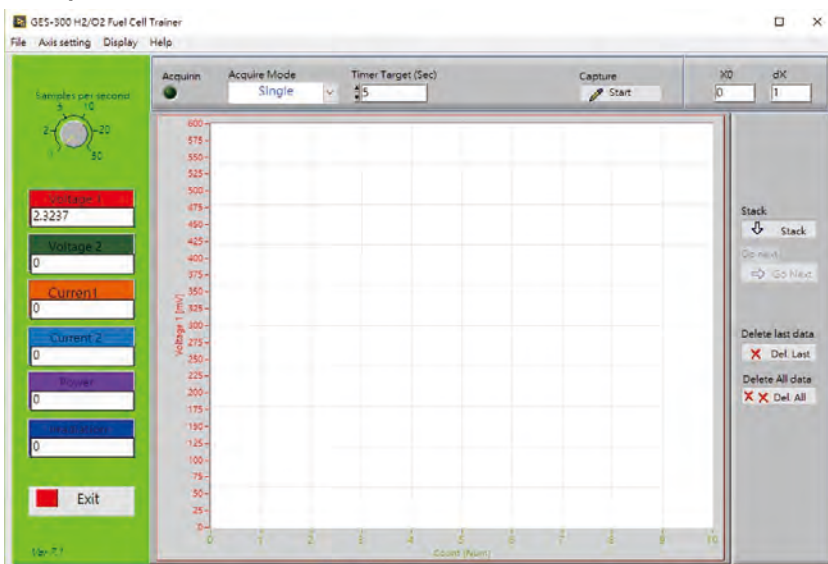

## Advantages of PEMFC Technologies

- Environmental Protection : the by-products are totally safe, H<sub>2</sub>/O<sub>2</sub> fuel cells only produce heat and water.
- Reliability : provide high-quality, reliable, and consistent power supply.

## Data Acquisition Device with Software

Constructed a complete fuel cell database and used for study, research and development.
